

DATA SCIENCE TOOLS AND REVIEW

Nauman Nayyar

DATA SCIENCE TOOLS AND REVIEW

LEARNING OBJECTIVES

- ▶ Using Git to create and share your work
- ▶ Data Visualization
- ▶ Describe Probability vs Odds
- ▶ Performing exploratory analysis!

COURSE

PRE-WORK

PRE-WORK REVIEW

- ▶ Explain the difference between variance and bias
- ▶ Use descriptive stats to understand your data

INTRODUCTION

GIT

GIT

- ▶ Version control is necessary when working on complex projects.
- ▶ Git is a way of tracking changes we've made to our programs that allows us to go back in time to fix errors.
- ▶ Combined with Github, Git is a powerful tool for collaborating with colleagues. You can work on different aspects of projects simultaneously and merge the changes together seamlessly.
- ▶ There are many different ways to use these tools.

GIT

- ▶ Let's see an example of using Git and Github.
- ▶ There are three primary commands we'll use.
 - ▶ `git add`
 - ▶ `git commit`
 - ▶ `git push`
- ▶ When we want to implement a colleague's change, we may use the command `git pull`.

GUIDED PRACTICE

GIT

ACTIVITY: GIT

EXERCISE

DIRECTIONS (20 minutes)

1. Let's set up student repositories and move project and student work to them.

DELIVERABLE

Questions

GUIDED PRACTICE

DATA VISUALIZATION

LET'S DISCUSS THE CURRENT LESSON OBJECTIVES

- ▶ Visualizing data is very important
- ▶ Let's spend some time going through a Data Visualization lab!

GUIDED PRACTICE

ODDS AND PROBABILITY

ACTIVITY: ODDS & PROBABILITY

EXERCISE

DIRECTIONS (20 minutes)

Some of you may already be familiar with odds and probability.

1. We will use the starter code in lesson-05 of the class repo to review the concepts of odds and probability.

DELIVERABLE

Answer the questions in the notebook

EXERCISE

EXPLORATORY DATA ANALYSIS

ACTIVITY: EXPLORATORY DATA ANALYSIS

EXERCISE

DIRECTIONS (45 minutes)

1. Let's work on a dataset! <http://archive.ics.uci.edu/ml/datasets/Adult>
 - A. State a SMART problem statement
 - B. Explore the data keeping in mind:
 - A. Is there missing data? How would you deal with it?
 - B. What are the variable distributions? Plot data using the lab exercises

DELIVERABLE

Answers to questions

CONCLUSION

TOPIC REVIEW

REVIEW

- ▶ Why is data visualization important?
- ▶ Are you comfortable with Git?
- ▶ Are you comfortable with exploratory analysis now...?
